

What future Strategy Note topics?

Strategy Notes will continue the current topic of building a strong labor union movement in North Carolina for a while. What topic should follow?

Topics I've begun considering:

- Building a society good for rural people.
- Healthcare.
- Building a society good for women and girls.
- Eliminating racism.
- Eliminating nuclear weapons.
- Eliminating imperialism.
- Eliminating gender roles.
- Eliminating litter.
- Building a society good for people of all ages and abilities.
- If a United States constitutional convention happens, what changes should we advocate?
- How to reverse the rightward tendency in US electoral politics.
- Defeating an attempted coup or dictator in the United States.
- Pandemics: causes and prevention.
- Building a decent transportation system (e-bikes, networks of walk/bike trails with hostels every ten to twenty kilometers, solar dirigibles, high-speed trains, wind-powered hydrofoil ships, underground hypersonic tubes, space elevator, interplanetary solar sail ships).
- Building a space program that serves everybody.
- How to provide everybody clean drinking water, nutritious food, decent shelter, opportunity to learn whatever they want to learn, and the ability to communicate with whomever they mutually want to communicate with.
